

Marketing Campaign Performance Dashboard

Project Report & Analysis Document

Abstract

This project analyzes marketing campaign performance across multiple platforms to evaluate ROI, conversions, customer acquisition, audience engagement, and marketing efficiency using Power BI.

Objectives

- Monitor campaign performance
- Track marketing ROI
- Analyze customer acquisition
- Evaluate audience engagement
- Support budget optimization

Dataset Overview

The dataset contains campaign information including impressions, clicks, leads, conversions, spend, revenue, ROI, CPC, CPM, CAC, audience segments, platforms, and regions.

Data Cleaning Process

Missing value treatment, duplicate removal, date formatting, platform standardization, audience standardization, outlier detection, and data validation were performed.

Key KPIs

Total Marketing Spend, Revenue Generated, ROI %, CTR %, Conversion Rate %, CPC, CPM, CAC, Lead Conversion Rate, and Revenue per Campaign.

Analysis & Insights

- Festive campaigns delivered the highest ROI.
- Google generated the highest revenue contribution.
- Email marketing produced strong ROI efficiency.
- New Customers generated the highest revenue contribution.
- Retargeting campaigns showed strong conversion performance.
- North Region emerged as the most profitable region.

Business Recommendations

Increase investment in high-ROI campaigns, optimize low-performing campaigns, improve landing page conversions, expand retargeting initiatives, and focus on high-converting audience segments.

Dashboard Components

KPI Cards, Campaign Trend Analysis, Top Campaigns by Revenue, Top Campaigns by ROI, Platform Analysis, Funnel Analysis, Audience Analysis, and Regional Performance Analysis.

Conclusion

The dashboard provides actionable insights that help marketing teams improve campaign effectiveness, optimize spending, and maximize business growth.
